RIPPER BEDDERS

***Quality Tillage Tools For Maximizing
Yields And Profits***

- Improved moisture management
- Faster soil warm up for earlier planting
- In-row subsoiling for deeper root penetration, healthier plants
- Low maintenance and repair expense

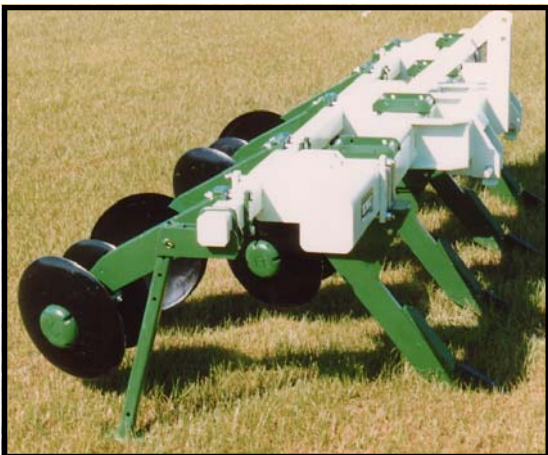

Stack Fold toolbars (8, 10 and 12 row ripper bedders & disc bedders). Shown with optional hydraulic folding row markers.

Double (20" & 18" dia.) or single (20" dia.) disc gangs with cast iron hubs and triple sealed bearings.

KMC Bedders, The Key To A Superior Bedding Job - Every time!

- Designed with plenty of sturdiness to handle tough bedding operations in light or heavy soil types.
- All ripper bedder models (and some conventional disc bedder models) now equipped with heavier 7" x 7" x 3/8" wall thickness toolbars for increased strength and durability.
- Ripper bedder models and Conventional disc bedders available in 2, 4, 6, 8, 10, and 12 row sizes.
- Available in widest range of models and sizes anywhere!

Two Bar Models - Disc gangs bolted to 4" x 4" auxiliary toolbar rigidly clamped to ripper toolbar.

Two Ripper Bedder Styles Available:

Parallel Linkage Models - Disc gangs clamped to floating 4" x 4" rear toolbar (with 8 x 10 gauge wheels) connected to ripper bar with parallel linkages.
