# SUBSOILER / LEVELER

## ***Prepare seedbeds with the NEW KMC Subsoiler / Leveler!***

- Nine shank model totally fractures the hardpan on a 158 inch width when equipped with optional Floating Wings.
- 12 3/4 diameter, spring loaded, steel roller with cleats prepares a smooth, firm seed bed for planting fall cover crops or spring row crops.
- Standard KMC Residue Manager Shanks provide 30 inch clearance and 12 to 14 inch deep tillage.
- Unique staggered arrangement of Subsoiler Shanks provide for easy flow of heavy residue around shanks.

High clearance,  
3 inches longer,  
Residue Manager  
Shanks provide 33 inch  
clearance and up to 17  
inch deep tillage.

Optional Floating Wings  
attached to the rear of  
each shank provide total  
fracture of hardpan.

Steel roller with cleats  
prepares a smooth, firm  
seed bed for planting . . .

The New KMC  
Splitter Subsoiler Point has  
proven effective to signifi-  
cantly reduce blowout!
