Job Description: KMC is seeking a qualified candidate for a Maintenance position. The Industrial Electrician will be responsible for the following:

- performing routine maintenance of equipment, electrical systems and plant facilities in activities using a general knowledge of mechanics and other maintenance practices.
- following proper procedures in routine electrical and mechanical repair of equipment.
- assisting mechanics with installing, maintaining, and repairing existing equipment.
- assisting mechanics with completion of carpentry assignments and other routine facility repair.
- working from drawings and blueprints.
- using a wide range of precision measuring instruments and devices in the repair and maintenance of equipment and facilities.
- recording all maintenance related activity on prescribed forms and documents.
- reporting all accidents and injuries to either the Plant Engineer or Working Group Leader.
- cutting the grass on the Plant property on a rotating basis (rotating with the other Mechanics and Working Group Leaders).
- sweeping the plant floor with the "Rack and Floor Sweeper" on a rotating basis.
- emptying the trash in the back of the plant (on a rotating basis).
- troubleshoot, repair, and install electrical equipment to help meet production goals.
- troubleshoot and maintain three (3) phase electrical systems.
- diagnose cause of electrical malfunction or failure of operational equipment.
- perform preventative and corrective maintenance.
- effectively resolve production problems in a timely manner.
- troubleshoot low voltage systems.
- troubleshoot and repair motor control devices, switch panels, transformers, and other electrical equipment and components.
- any other task(s) as assigned.

Required Skills:

- 2-5 years of industrial experience.
- Electrical/Electronic/ Automation technician diploma/degree/certificate considered an asset.
- A working knowledge in PLC applications and software.
- Strong analytical skills
- Strong interpersonal and communication skills.
- Ability to work in a safe and efficient manner.
- Solid background in heavy industry.

Benefits: KMC has excellent medical and other benefits such as participation in KMC's Employee Stock Ownership Plan (ESOP). Salary is based on qualifications and experience.
